

**ROMETRON**  
AUSTRALIA

**SPOT** *and* **BLANKET**  
**ALL-IN-ONE with PWM**

**WEED·IT**   
precision spraying

# FEATURES

- Fully integrated into your sprayer
- WEED-IT precision spot spraying technology
- WEED-IT precision blanket spraying technology
- 50 Hz Pulse Width Modulation (PWM)
- 25 cm nozzle spacing
- 1 metre sections
- 3 spray modes, spot spray, dual spray, blanket
- Automatic background calibration
- Works day and night
- ISOBUS
- Typical spot spray speeds of 15-18 kph

# BENEFITS

- Simple operation
- Reduced chemical costs by up to 90%
- Frequent spraying of actively growing small weeds
- Use higher chemical rates with different / expensive chemistries on hard to kill weeds
- 50 Hz PWM (5 x faster than competitors)
  - Control your rate independent of speed and pressure
  - Maintain a constant droplet size over a wider speed range
  - Exact rate from each nozzle with turn compensation
- Maximise savings with 1 metre sections
- Significantly less chemicals in your soil

**“ We’re seeing more and more hard to kill weeds. WEED-IT allows us to use higher rates and other chemistries that you couldn’t justify at blanket rates. We can now attack fleabane earlier and with higher rates. I think it’s exceptional the way it’s been added to the sprayer. With WEED-IT we’re saving at least three hours every day using one tank instead of four or five.”**

**Goldacres G8 Retrofit**

Jarrod Munroe,  
OUYEN, VICTORIA

**“ In a dry summer when you get 15-20 mm of rain, you get some stuff up but not much – that’s when you’ll spot all summer – you won’t blanket. I was really keen to get PWM with variable speed rate control and turn compensation, it’s tried and tested – it’s the way forward really. On Day 1 we spotted a 95 Ha paddock and sprayed about 15 Ha out of the whole paddock. I came back and told Julia “we just saved three grand for the day” – she was pretty happy with that.”**

**Goldacres 6536 Retrofit**

Craig and Julia Thomas,  
YOUANMITE, VICTORIA

# Retrofit WEED-IT to your sprayer

Rometron Australia are proud to partner with authorised dealers to make WEED-IT retrofit options available to farmers.

Turn your sprayer (new or existing) into a state-of-the-art spot sprayer and blanket sprayer thanks to industry leading WEED-IT detection technology paired with the beauty and precision of PWM, controlling rate at every nozzle across varying speeds and with turn compensation.

WEED-IT can be fitted to most Self-Propelled and Trailing sprayer with kits for John Deere, Goldacres, Rogator and Millennium Booms available now.
